

Televic's D-Cerno System: A Transformative Upgrade for Vietnam's National Assembly

The National Assembly of Vietnam, a symbol of democracy and progress, has recently undergone a significant upgrade to its audio and interpretation systems. The aging equipment from Beyerdynamic was replaced with Televic's D-Cerno Conference System, a state-of-the-art solution that delivers impeccable sound clarity, seamless integration, and zero interference. This upgrade not only enhances the functionality of the system but also sets a new standard for conference solutions in Vietnam.

The challenge:

The challenge of finding replacements for the original **Beyerdynamic systems** was not limited to **technical requirements** but also included the **logistical aspect**. The customized conference microphone system in the main meeting hall was no longer in production, which required **AIC Group**, the exclusive distributor of **Televic conference solutions in Vietnam**, to find suitable alternatives that would seamlessly integrate into the existing infrastructure.

Enter AIC group:

AIC Group, having introduced **Televic's conference products to Vietnam in 2012**, showcased the superiority of the **D-Cerno Conference System**. The system met all the demanding specifications, including reputation, state-of-the-art digital technology, zero interference, impeccable sound quality, user-friendliness, and seamless third-party integration. AIC's expertise in operating the **AVCS** in the **National Assembly House** positioned them as the ideal guide for the investor.

AIC won the contract against other competitors, facilitating the installation of the **D-Cerno system** in the Lotus Guest Room of the National Assembly House on **July 20th, 2023**. The debut of Televic's cutting-edge technology in the esteemed halls of Vietnamese governance marked a significant milestone for both companies.

The solution:

The **D-Cerno system** quickly became an **integral part** of crucial meetings and diplomatic discussions at the National Assembly, playing a pivotal role in **key diplomatic discussions** worldwide, **fostering collaboration** among world leaders, and **contributing to the effective management of global challenges**.

The impact:

The **National Assembly**, often seen as a benchmark for other government bodies, ministries, and provinces, now sets its standards with **Televic's conference system**. This not only marks a significant milestone for Televic but also opens doors for **future collaborations and expansions** within the facility. The project has not only met the technical demands but has become a catalyst for Televic to increase its market share **in Vietnam**.

In the vibrant landscape of Vietnam's political arena, **Televic's D-Cerno Conference System**, championed by **AIC Group**, has seamlessly integrated itself as the audio-visual backbone of the National Assembly House. The success of this project not only exemplifies the **adaptability and reliability** of Televic's technology but also sets a new standard for conference solutions in Vietnam, ensuring that the voice of Vietnam resonates with clarity and distinction on the global stage.
