Tech Partners
Let's work together

Televic is a leading expert in conferencing technology that enhances your meeting's efficiency. **Professionalize your city or municipal council meetings by digitizing them**. Improve efficiency and intelligibility in any live, virtual, or hybrid debate with our customizable, user-friendly, and transparent conferencing and voting solutions. **Control active speakers, set speech timers for each participant, collect votes automatically, and share results at once**.

televic & Extron

Televic and Extron collaborate in technology integrations, combining their strengths to provide tailored solutions that precisely address customer requirements.

Extron's product solutions specialize in connecting, converting, and distributing audiovisual signals, while also offering comprehensive control for audiovisual systems.

The Confero driver integrates with Extron to offer a certified solution that can control different items like headphone volume or loudspeaker volume, microphone activations, meeting statuses, recording or powering off wireless G4 units.

televic & CRESTRON

Televic and Crestron work together in a technological collaboration. Combining their capabilities to provide solutions tailored to the needs of their customers.

Crestron is the world's leading innovator and manufacturer of advanced control and automation systems for the office, campus, and home, reinventing the way people live and work.

The Crestron driver is available both for CoCon as well as Confero installations and offers the possibility to control the volume of headphone and loudspeakers, manage the microphone activations, meeting management and voting management, start and stop recording. The drivers come with a demo program with layout and have the required help files for each module.

televic & Q-SYS

Televic and Q-SYS collaborated in a technology integration, combining their expertise to provide a tailored solution that perfectly meets the needs of our customers.

Q-SYS specializes in audio reinforcement through a diverse range of products and excels in seamlessly controlling the entire system from a single location.

The Confero plugin integrates with Q-SYS to offer an all-in-one software package that simplifies room setup and meeting moderation. It includes three tabs: "System", "Meeting" and "Recording." The "System" tab is used to connect to the Confero Conference via the IP address and a verification token. It shows all available units as well as the status of the microphones, plus allows for volume adjustment of the headphones and speakers. The "Meeting" tab displays information about the meeting and the participants with ability to control the state of the microphones. And the "Recording" tab is used to start and stop the recording of the meeting. The status color changes when the recording is on, off or unavailable.

televic & Symetrix

Symetrix continues to enable inspirational AV experiences while serving our unique mission to be a force for good in the world. Symetrix was created to make tools that deliver brilliant audio quality.

The Confero plugin is a module that allows to change the headphone and loudspeaker volume, control up to 30 microphones, manage the recording and manage the speaker and request list.

televic & AMX

Televic and AMX join forces in dynamic technology integrations, synergizing their capabilities to craft solutions that not only meet, but exhilarate customer needs.

AMX stands out for its prowess in developing cutting-edge, scalable technology solutions tailored for meeting spaces, along with comprehensive video distribution and management solutions that span entire buildings. It's a collaboration driven by innovation and a shared commitment to delivering exceptional solutions.

The AMX module allows to control the microphones in the room and to control the speaker and request list.
